MISSION CONTROL

Engaging in Learning Outdoors: Taking our Multi-Track Magnet Program Outside

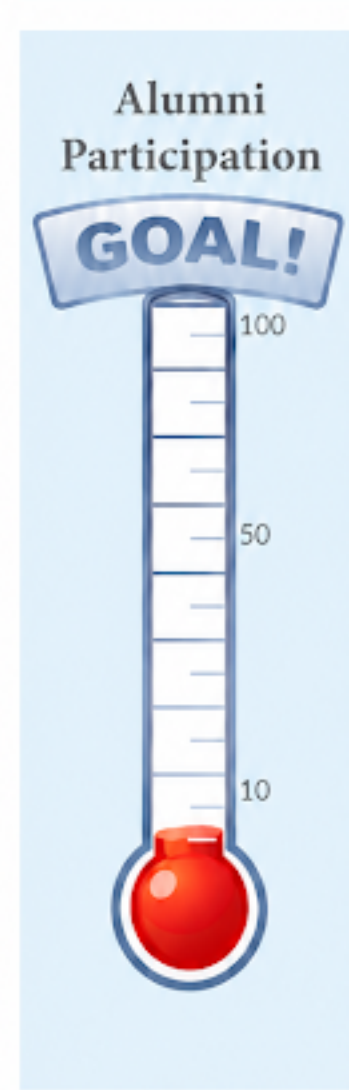

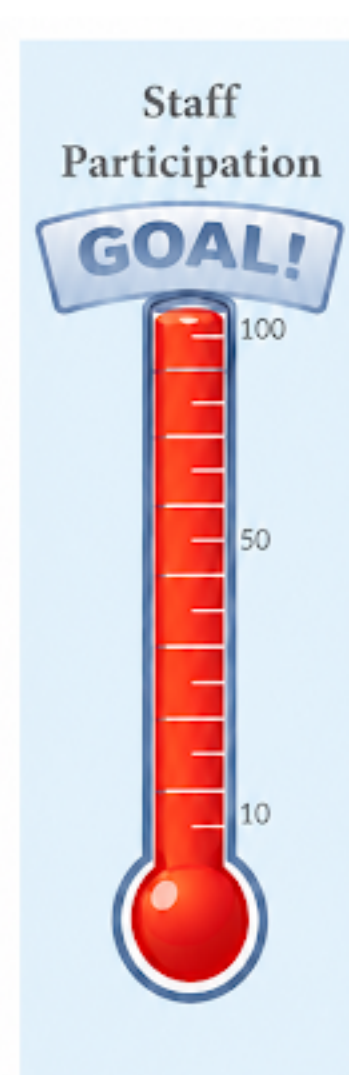

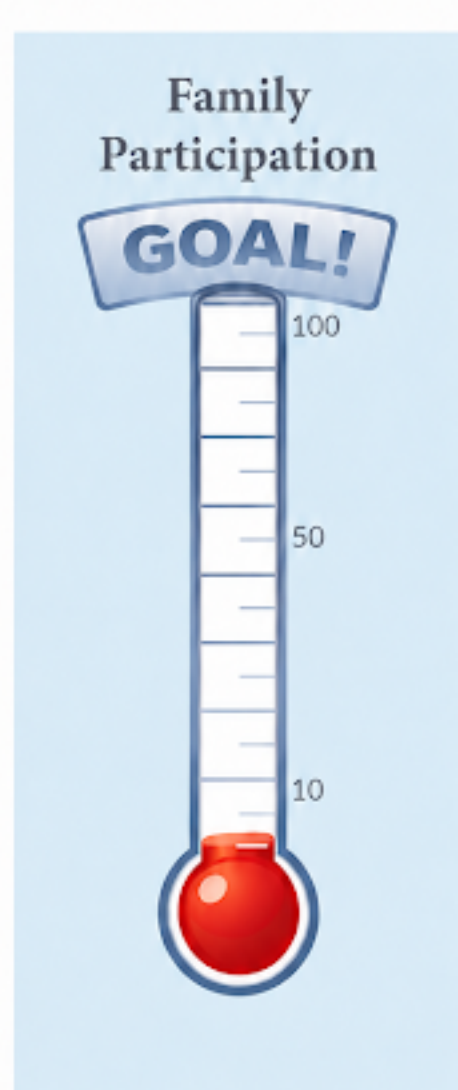

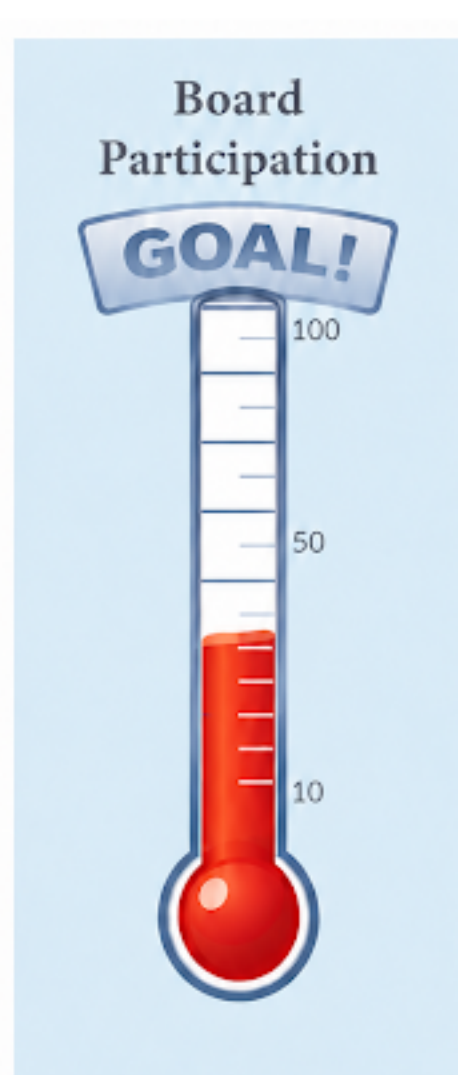

We are developing and refining our outdoor learning areas for each of our three (3) magnet tracks. Each magnet track will have its own dedicated outdoor space for learning. With our ambitious goal of 50% of our instructional time spent as problem-based or project-based learning we also are striving to include as much time outside on the property as possible. When you visit our campus please inquire about these outdoor learning areas.

Annual Fund & Upcoming Events

The Importance of Contributing to the Annual Fund & Who Should Contribute

Our goal for Keystone Prep High School's Annual Fund is 100% participation from all stakeholders, which includes current and past Keystone Prep families, Alumni, Keystone Prep staff, and Keystone Prep Board Members. Additionally, all stakeholders are encouraged to engage their own social networks to inspire them to help support the mission of Keystone Prep High School through a donation to our Annual Fund.

This degree of contribution is necessary as the average cost to educate a student at Keystone Prep is significantly higher than the tuition per student. Since we also believe that a student who would benefit from Keystone Prep should never be turned away for economic reasons, this fund also provides scholarships for all students who should be at Keystone Prep.

August Deep Dive - By Ken Wildner, Head of School The Adolescent Brain, Green Spaces, Electronic Devices, and Diagnosis: The Not So Mysterious Epidemic of ADHD, Anxiety, Depression, and Executive Functioning Disorder

With the exception of the last 150 years or so, roughly the beginning of the Second Industrial Revolution, humans have lived in, and evolved in, primarily outdoor environments. Since the Second Industrial Revolution much of our living and work day time has shifted indoors. However, much of our leisure time was still spent in outdoor environments and with the rise of suburbia after World War II many of those outdoor environments were green spaces. Since the advent of personal devices that can stream any type of media content to anyone at any time, much of the available leisure time has moved from outdoor, and oftentimes green spaces, to indoor spaces creating a largely indoor lifestyle.

There is strong evidence to suggest that exposure to outdoor green spaces reduces the symptoms of anxiety, depression, ADHD, and Executive Functioning issues. Additionally, exposure to green spaces and exercise are the only things that reduce these symptoms without any side effects. This fact, however, may not go far enough. Considering the evolution and history of humanity a seemingly accurate converse statement regarding the psychological diagnosis and their corresponding symptoms, previously mentioned might be that long-term exposure to indoor spaces and lack of physical exercise could cause, or at least trigger, the otherwise latent conditions of anxiety, depression, ADHD, and Executive Functioning issues.

By instituting an indoor lifestyle largely devoid of exercise and parenting via electronic device we may actually be doing harm to our children, insofar as providing them with a resource that almost mandates indoor time and actually lessens the natural amount of the that they would have otherwise spent outdoors, under sunlight, and doing some type of physical activity. This is not to say that sending your students outside without their electronic devices will solve whatever issues you and your students are currently experiencing, but since outdoor activities reduce these symptoms and have no side effects, as many prescriptions do, what do you have to lose?

This is a primary reason why, here at Keystone Prep High School, we encourage our students to spend as much time outside during lunch and during our full-hour recess/lunch on Mondays and Fridays, and we encourage our teachers to prepare lessons, which will get our students outside as often as possible, while still delivering a high quality education.

Welcome Halana Thomas!

STUDENT SERVICES
Halana Thomas
ESE Specialist

Mrs. Halana Thomas

is Keystone Prep's new ESE Specialist! Halana brings valuable knowledge, compassion, and a strong commitment to helping every student succeed. She will work closely with students, families, and teachers to provide individualized support, specifically in reading and math. She will strengthen essential skills, and ensure each student has the tools they need to thrive.

Mrs. Lara Lais

has stepped into her new role as Keystone Prep's Director of Admissions!
